

Traditional Transport vs Modern Transport

Modern transport	Traditional transport
Cars, buses, and trains are used for travel.	Horse carriages and bullock carts were used for travel.
Travel is fast and takes hours or minutes.	Travel was very slow and took many days.
Goods are carried by trucks, ships, and airplanes.	Goods were carried by animals or boats
Travel is comfortable and much safer.	Travel was uncomfortable and unsafe.
People can travel long distances easily.	People could only travel short distances.

How Modern Transport Improved Speed and Safety

1. Modern transport is much faster, so people can reach places quickly using cars, trains, and airplanes.
2. Safety has improved because of better roads, traffic rules, seat belts, and advanced vehicles.
3. Modern transport helps daily life by making work, trade, and travel easier and more efficient.
